Terraform scripts to Provision AWS EKS

Steps to be followed:

- Create an IAM (Identity Access Management) user in AWS and add user to the user_group
 - Sign in into AWS console with your crendentials
 - IAM -> Add user -> name -> add to Group -> add tags -> ok and save.
 - After adding user ,Download new_user_credentials.csv file .
 - Go to the file location and copy the credentials
 - Open the terminal
 - \$ cd Downloads/
 - \$ aws configure --profile <profile name>
 - \$ AWS Access Key ID : <paste from the csv file>
 - \$ AWS Secret Access Key: <paste from the csv file>
 - \$ Default region name: us-east-1 \$ Default output format: json

```
MINGW64:/c/Users/DELL/Downloads

DELL@DESKTOP-VFQ1S03 MINGW64 ~/Downloads
$ cat new_user_credentials.csv
User name,Password,Access key ID,Secret access key,Console login link
terraform,,AKIAWFCL3LBELKYCT4F3,eCXGnAq9AicQUMFZQMHWozM9cT07IochUqavmiYd,https:/

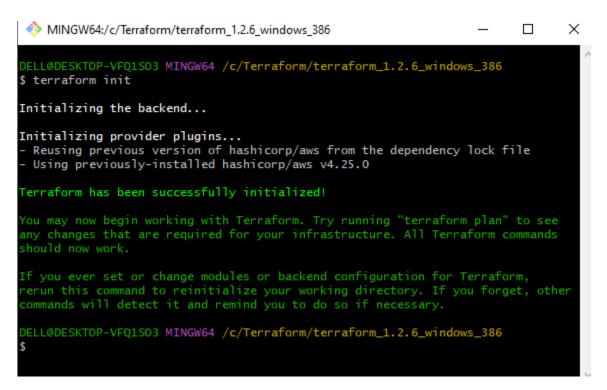

DELL@DESKTOP-VFQ1S03 MINGW64 ~/Downloads
$ aws configure --profile terraform
AWS Access Key ID [None]: AKIAWFCL3LBELKYCT4F3
AWS Secret Access Key [None]: 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
Default region name [None]: us-east-1
Default output format [None]: json|
```

- 2. Create the following Terraform Scripts:
 - provider.tf
 - vpc.tf
 - internet-gateway.tf
 - subnets.tf
 - eips.tf
 - nat-gateways,tf

- route-tables.tf
- route-table-association.tf
- eks.tf
- eks-nodegroup.tf
- 3. Please find below url of my Github Repository for the Source code, where you can find all the Terraform Scripts as mentioned above.

https://github.com/akshaykumart/terraform-EKS.git

- 4. Go to the Terminal:

- \$ terraform plan
- \$ terraform apply

Note: You didn't use the -out option to save this plan, so Terraform can't guarantee to take exactly these actions if you run "terraform apply" now.

DELL@DESKTOP-VFQ1SO3 MINGW64 /c/Terraform/terraform_1.2.6_windows_386

MINGW64:/c/Terraform/terraform_1.2.6_windows_386

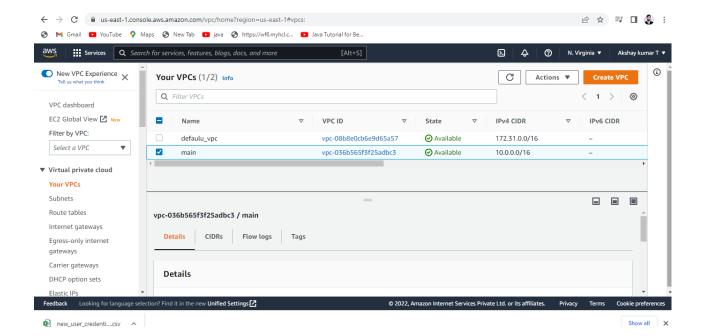

```
ELL@DESKTOP-VFQ1S03 MINGW64 /c/Terraform/terraform_1.2.6_windows_386
$ terraform fmt
 ELL@DESKTOP-VFQ1S03 MINGW64 /c/Terraform/terraform_1.2.6_windows_386
$ terraform plan
aws_vpc.main: Refreshing state... [id=vpc-036b565f3f25adbc3]
Terraform used the selected providers to generate the following execution plan. Resource actions are indicated with the following symbols:
Terraform will perform the following actions:
 + owner_id = (known after apply)
+ tags = {
+ "Name" = "main"
      vpc_id = "vpc-036b565f3f25adbc3"
Plan: 1 to add, 0 to change, 0 to destroy.
Note: You didn't use the -out option to save this plan, so Terraform can't
guarantee to take exactly these actions if you run "terraform apply" now.
 DELL@DESKTOP-VFQ1S03 MINGW64 /c/Terraform/terraform_1.2.6_windows_386
MINGW64:/c/Terraform/terraform_1.2.6_windows_386
```

```
- "Name" = "public-us-east
- "kubernetes.io/cluster/eks" = "shared"
- "kubernetes.io/role/elb" = "1"
         }
tags_all = {
    "Name" = "public-us-east-la"
    + "kubernetes.io/cluster/eks" = "shared"
    + "kubernetes.io/role/elb" = "1"
         vpc_id
                                                                    = "vpc-036b565f3f25adbc3"
    aws_subnet.public_2 will be created
resource "aws_subnet" "public_2" {
      = "vpc-036b565f3f25adbc3"
Plan: 4 to add, 0 to change, 0 to destroy.
Note: You didn't use the -out option to save this plan, so Terraform can't
guarantee to take exactly these actions if you run "terraform apply" now.
```

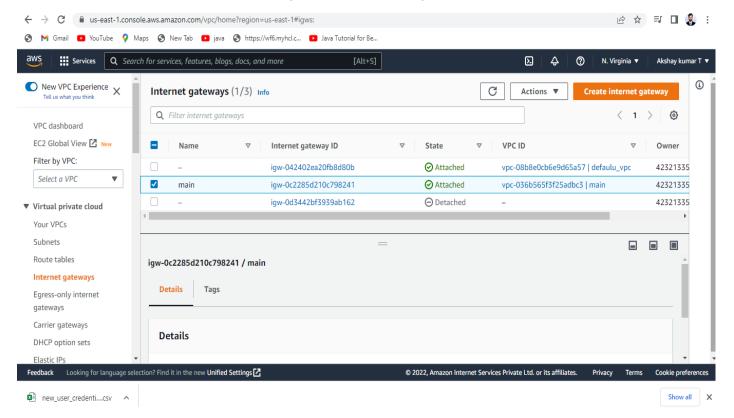

```
MINGW64:/c/Terraform/terraform_1.2.6_windows_386

```

5. Validations:

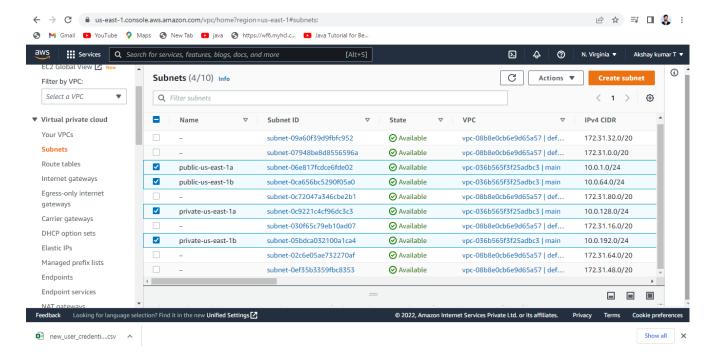

Login to AWS console and check whether the following things are created or not.

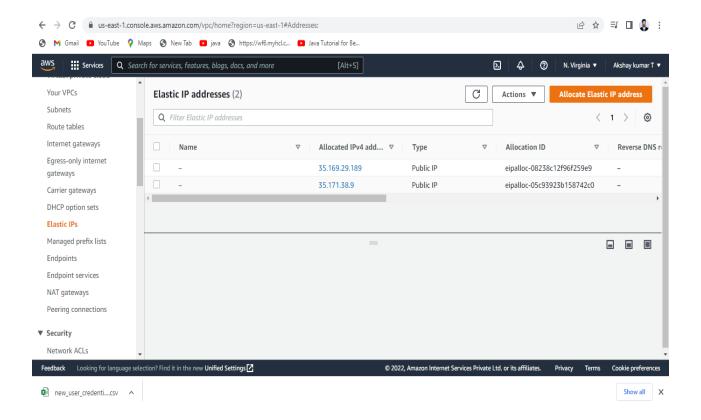

Validate own VPC created as per the Terraform script as shown above

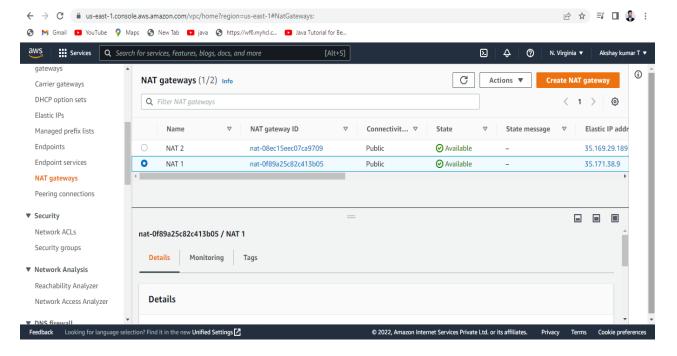

Validate IGW (Internet Gate Way) created as per the Terraform script as shown above

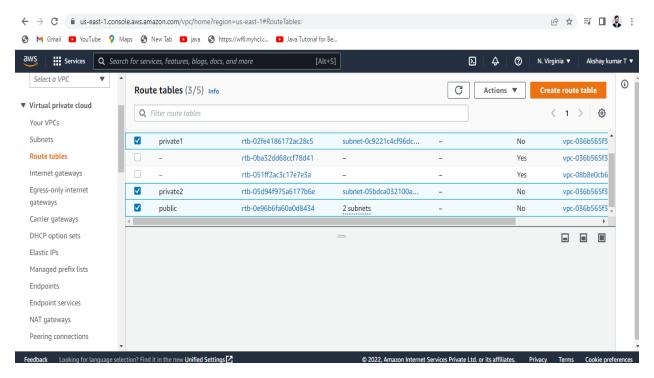

Validate Subnets created as per the Terraform script as shown above.

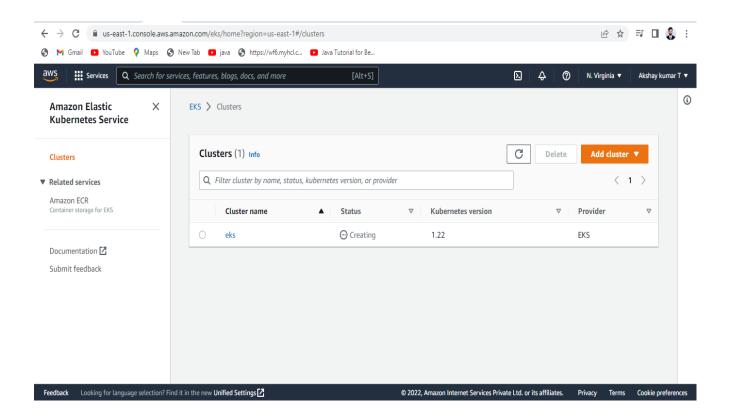

Validate Elastic IP's created as per the Terraform Script as shown above.

Validate NAT Gateways created as per the Terraform Script as shown above.

Validate the Routing Tables as per the Terraform script as shown above.

Validate the EKS Cluster as per the Terraform Script as shown above.
